

NICHBA

THE PRODUCT GUIDE
BATHROOM COLLECTION

NICHBA's philosophy is an exercise in **simplicity**. Creating minimal yet functional products for the everyday. Based on traditional Danish design **values** and authentic local **craftsmanship**, NICHBA products are brought to life with passion and values hand in hand. Rather than focusing on the trends of tomorrow, NICHBA is dedicated to **rethinking** and simplifying objects of today. Creating an effortless style for people's ever- changing daily rituals.

MATERIALS

POWDER COATING Our certified powdercoating process ensures a high quality treatment of the steel – All our steel products are powdercoated. The powdercoating works as a protective layer that comes in a variety of colours and makes the products durable in both wet areas and for everyday use. Recycled powder coating.

STEEL Mild steel is a strong and convenient material – mild steel works well with our innovative wardrobe solution, which is based on magnetic clothes hangers and hooks.

ALUMINUM 6000 series is a lightweight and very durable material. Ideal for both outside and inside use. The material is a preferred choice when it comes to bigger items or bigger projects where high quality and flexibility in weight modifications is needed to keep the shipping costs low on a large-scale shipment.

STAINLESS STEEL Stainless steel is extremely weatherproof. All products made for wet areas are made of stainless steel with a high quality powder coated surface.
